TECHNICAL SKILLS

React, NodeJs, Express, Redux, REST APIs, NextJs, MySQL

RECENT WEB APPLICATION PROJECTS

What2Wear App | Beta Testing | GitHub Link
A weather app that allows users determine an outfit choice based on the user's location and current weather conditions. **React, Node, Express, REST APIs**

Subscription App | Live Demo | GitHub Link
A multi-step service subscription app with email validation using an API and live payment integration. **React, Node, Express, REST APIs, Tailwind CSS**

RECENT WORK EXPERIENCE

Front-End Developer (volunteering) @ Chingu   *Oct. 2022 – Present*

- Was responsible for maintaining a couple of application components for react projects.
- Collaborated with teammates to build and integrate custom REST APIs that allowed seamless data exchange between multiple servers.
- Worked closely with the UX/Design team to make a seamless and integrated user experience.
- Served as guide to Tier1 developer teams during the 6-week Chingu.io internship, offering coding direction and additional non-technical advice.

Front-End Developer @ FeDevs   *Jan 2020 – May 2022*

- Built & maintained 20+ custom CMS sites, tools and services.
- Implemented multi-factor authentication systems to prevent unauthorized access to paid resources, resulting in 40% cost-savings and enhanced security systems for clients.
- Identified and fixed web page layout and design issues.
- Increased client conversion by 30% by integrating secure payment methods and improving accessibility for conversion forms.

TECH-COMMUNITY ENGAGEMENT

Dev Advocate, WWT Cohort - helping new developers grow and become ready for the job market.

Voyage Guide, Chingu.io - helping developers gain useful experience needed to land a Software Developer job.

EDUCATION

University of Ilorin (Ilorin, NG)
BSc. Industrial Chemistry.
