---

TECHNICAL SKILLS

React / NextJs, TypeScript, NodeJs, Express, REST APIs, Redux, Jest / Vitest, JavaScript, MySQL

RECENT WORK EXPERIENCE

Front-End Developer @ TheForgottenAdoptionOption   *May 2022 – July 2023*

- Built a custom chatbot to improve support and provide hands on information to users at all time.
- Migrated the codebase to tailwindCSS to allow for easy customization experience for developers and providing a smoother responsive experience for users.
- Collaborated with teammates to improve page contents for users.

Front-End Developer @ Chingu   *Oct. 2022 – Present*

- Was responsible for maintaining a couple of application components for react projects.
- Collaborated with teammates to build and integrate custom REST APIs that allowed seamless data exchange between multiple servers.
- Worked closely with the UX/Design team to make a seamless and integrated user experience.
- Served as guide to Tier1 developer teams during the 6-week Chingu.io internship, offering coding direction and additional non-technical advice.

Front-End Developer @ Arvo Trade   *Jan 2020 – May 2022*

- Built & maintained 20+ custom CMS sites, plugins and tools.
- Implemented multi-factor authentication systems to prevent unauthorized access to paid resources, resulting in 40% cost-savings and enhanced security systems for clients.
- Identified and fixed web page layout and design issues.
- Increased client conversion by 30% by integrating secure payment methods and improving accessibility for conversion forms.

RECENT WEB APPLICATION PROJECTS

What2Wear App | Live Demo | GitHub Link
A weather app that recommends outfit styles to users based on their location and current weather conditions. **React, Node, Express, REST APIs**

TECH-COMMUNITY ENGAGEMENT

Community Manager, WWT Cohort - helping new developers grow and become ready for the job market.
